Projects

To Design Sensor Architecture with Cloud Analytics In the Mining Industry   **Aug'22 - Feb'23**
Through our project, we tried to solve one of the major problems of the mining industry, i.e. health and safety.

- We made a device to detect the temperature, humidity, and gaseous.

- After collecting the data we will send it to the cloud platform to analyze and optimize it.

Personal Portfolio Webpage
Programming Language- HTML, CSS, JavaScript

- It is my portfolio where I put all my skills, and projects that I did in Engineering.

Bubble Game
Programming Language- HTML, CSS, JavaScript

- In this game I made a scoreboard that has HIT, TIMER, and SCORE, and below part, there are bubbles having random numbers so, we have to hit the same number of bubbles having some time limit as soon as it ends we have the score on the board.

Insta Features
Programming Language- HTML, CSS, JavaScript
- I tried to make an Instagram feature app where some features of Instagram were added.
- Some features include a story view, horizontal scroll, vertical scroll, and a like button.
- I learned a lot during this project, and it polished my front-end skills.
